

Suhani J. Bhatt

Ahmedabad, Gujarat | P: +91 6352915829 | suhanib825@gmail.com | LinkedIn: <https://www.linkedin.com/in/suhanibhatt/> |
Portfolio: <https://suhani0810.github.io/>

EDUCATION

SAL Engineering and Technical University | Ahmedabad, Gujarat Bachelor of Engineering | May 2025

Major in Computer Engineering; Minors in Data Science
Cumulative GPA: 8.45/10

Relevant Coursework: Data Analysis, Software Engineering, Operating Systems, Algorithms, Artificial Intelligence

WORK EXPERIENCE

Rubixe-AI | Remote (Bangalore, KA)

Data Science Intern | August 2025 – April 2026

- Completed a 9-month professional tenure focused on industrial AI automation and predictive analytics.
- Developed a predictive framework to automate high-priority sorting for 25,000+ monthly IT tickets.
- Successfully delivered 5 end-to-end projects, reaching 91.67% accuracy in diagnostics and 0.8992 R-squared in price forecasting.
- Managed and processed large datasets with over 590,000 rows of information

BISAG-N | Gandhinagar, Gujarat

Data Science Intern | January 2025 – April 2025

- Built an object detection workflow using YOLOv8 and OpenCV to identify infrastructure in satellite images.
- Improved road detection accuracy (mAP) by 24% through advanced image pre-processing and geo-referencing.
- Automated data quality management by developing Python scripts for sub-region extraction.

Qspiders | Ahmedabad, Gujarat

Intern Engineer | June 2024 – July 2024

- Designed and developed a personal professional portfolio using HTML5, CSS3, and JavaScript to showcase data projects.
- Applied SQL for database design and learned Object-Oriented Programming (OOP) concepts through practical exercises.
- Studied Software Development Life Cycle (SDLC) methodologies to understand project workflows.

PROJECTS

Insurance Claim Prediction | Fintech

- Built a model to forecast claim approvals for a dataset of 590,000+ records.
- Fixed a major 3.6% class imbalance using SMOTE, ensuring the model remained reliable for risk assessment.
- Challenge: Cleaned and managed high-cardinality data without losing predictive accuracy.

Walk and Run Classification | IoT

- Created a Human Activity Recognition system using accelerometer and gyroscope data.
- Achieved 99.9% Accuracy and 1.00 Precision for identifying running activities.
- Challenge: Handled time-series variance by normalizing sensor data with StandardScaler.

Heart Disease Prediction | Healthcare

- Developed a classifier that achieved 91.67% Accuracy and a perfect Recall of 1.00.
- Optimized an XGBoost model to ensure zero false negatives, which is critical for clinical diagnostics.
- Challenge: Carefully balanced the trade-off between precision and recall to maintain overall reliability.

TECHNICAL SKILLS

- Languages & Libraries:** Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), SQL (MySQL).
- Machine Learning:** Predictive Modeling, Classification, Imbalanced Data Handling (SMOTE), Hyperparameter Tuning (GridSearchCV).
- Tools & Frameworks:** Power BI, Tableau, YOLOv8, OpenCV.
- Data Science:** Exploratory Data Analysis (EDA), Feature Engineering, Model Evaluation.

ADDITIONAL

- Languages:** Hindi, English, Gujarati
- Certifications:** IBM Data Analyst & Data Science Coursework (Coursera) | Issued February 2024 – August 2024
